List of users currently connected

Outstanding violations for user

Current status – Green indicates user is currently connected and yellow signifies not connected

The screenshot shows the Tetherli Remote Security Supervisor interface. It features three main panels: 'Active Agents' on the left, 'Violation History' in the center, and 'Chat Channel' on the right. The 'Active Agents' panel shows a list of users with their status (green for connected, yellow for not connected). The 'Violation History' panel shows a list of events such as 'Gadget Detected', 'Camera Block Detected', and 'Face Authentication Success'. The 'Chat Channel' panel shows a chat history with messages like 'Face Authentication Success' and a text input field at the bottom.

Force user screen to block

Unblock user screen

Face Authentication Events

Send chat message to user

User violation history

If screen blocked, unblock code is listed

# Part 3
